### Definitions

**Session:** A series of clicks on your site by an individual visitor during a specific period of time. A Session is initiated when the visitor arrives at your site, and it ends when the browser is closed or there is a period of inactivity (30 minutes). Session quantities will vary to some degree based on what type of visitor tracking method is employed.

**Pageviews:** A request from a visitor's browser for a displayable Web page. Verified's configuration controls which file extensions are treated as Pageviews. In general, images and other embedded content, such as style sheets and javascript, are not considered to be Pageviews.

**Bytes:** Each file requested by a visitor to your Website has a certain size associated with it that is recorded by the webserver (Bytes). By tabulating the size of each file, the total volume of the traffic can be assessed. Because Bytes numbers can be very large, data in this graph is abbreviated with terms such as MB for megabytes (million bytes).
